

The University of Holy Cross Radiologic Technology Program

Program Mission Statement

The University of Holy Cross Program in Radiologic Technology facilitates a multifaceted approach to excellence in education by providing students with an optimal learning experience through small class sizes, one-on-one instruction and competency-based instruction to ensure graduates competently perform imaging procedures. This will provide the health care community with competent, employable, entry-level radiographers, compassionate caregivers and dynamic members of the total health care team who will value and integrate learning as a life-long process.

Revised Summer 2013

Program Goals and Student Learning Outcomes

1. Students will graduate clinically competent.
 - SLO 1: Students will successfully execute diagnostic imaging procedures.
 - SLO 2: Students will demonstrate knowledge of proper radiation safety practices.
2. Students will graduate displaying effective communication skills.
 - SLO 1: Students will demonstrate effective oral communication.
 - SLO 2: Students will acquire pertinent patient information.
3. Students will graduate exhibiting critical thinking and problem-solving skills.
 - SLO 1: Students will demonstrate the knowledge of critical thinking and problem-solving as it relates to patient care.
 - SLO 2: Students will adapt standard procedures to accommodate patient variables.
4. Students will graduate functioning effectively as a professional member of the healthcare team.
 - SLO 1: Students will display ethical behavior and sound professional judgment in clinical practice.
 - SLO 2: Students will demonstrate performance of a qualified entry-level radiographer.

Goals and SLOs revised Fall 2018
