

For admission and participation in the University of Holy Cross Radiologic Technology Professional Training Component the student is required to:

- Complete a health screening that includes drug and TB testing. The student must provide documentation of the health screening and a negative drug screening.
- Complete and provide documentation of positive immunization titers for MMR, Varicella and Hepatitis B. In the event the MMR titer is negative or non-reactive the student is required to receive the MMR booster. In the event the Varicella and/or Hepatitis titer is/are negative or non-reactive the student is required to start the series again and provide proof of positive titer when the series is complete.
- Complete a background check and provide documentation of a clear background report.
- Obtain and provide documentation of current certification in Basic Life Support for Healthcare Providers through the American Heart Association. The student is required to renew BLS certification should it expire before completion of the professional training component.
- Provide documentation of health insurance coverage. The student is required to submit documentation of health insurance coverage each semester while enrolled in the Professional Training Component.

Detailed information on obtaining the above is provided to candidates who are accepted into the Program.
