

Business Administration Internship BUS 462

SPRING AND FALL INTERNSHIPS AVAILABLE

“Nothing ever becomes real until it is experienced.” – John Keats

Students who have completed an internship gain a leg up when they explore career and life opportunities. Internships not only enable you to explore possible career paths, they are a practical and very real way to gain experience, making you a more attractive candidate to employers.

WHAT IS AN INTERNSHIP?

An internship is an intensive, short-term learning experience that has significant academic and practical components.

Internships provide practical work experiences and acquaint students with the operations and administrative functions of the internship provider.

An internship is not the same as a summer or short-term job.

Worthwhile internships have structured learning goals, provide regular mentorship and offer a high-impact learning component that can strengthen your resume.

Student interns are supervised by on-site professionals in cooperation with a UHC faculty member. Internships may be paid or unpaid. All successfully completed internships earn academic credit. Students may earn up to 3 credit hours per semester through an internship. The requirement is that the student must intern for a minimum of 150 hours.

Prerequisites:

15 semester hours of Level 2 Business course work, 2.5 GPA and permission of the Internship Coordinator
